

PRICE LIST 2023

ECONOMICAL INSULATED GALVANIZED MONOBLOC SERIE 40

REV.1 DEL 15/05/2023

STANDARD INNER HEIGHT 221 CM – EXTERNAL 239 CM

TECHNICAL DETAILS

STRUCTURE: it's made up from base and roof profiles in galvanized metal sheet thickness **1,5 mm** and by columns thickness 1,0 mm. **Without longerons under floor.**

WALLS: varnished steel sandwich panels with expanded **polyurethane** foam insulation, thickness **mm 40**, colour **WHITE-GREY RAL 9002**.

ROOF: horizontal, made from corrugated sandwich panels with expanded **polyurethane** foam insulation, thickness **30/70 mm**.

FLOOR: walking area made with **PVC** sheets fixed to chipboard panel thickness **mm 18**, upper to the basic frame.

WINDOWS AND DOORS: in aluminium/PVC white **RAL 9010** colour, with mm 4 glass, safety bars.

01 external door cm 90x200H, 1/2 glass and 1/2 blind

01 sliding opening window 90x98H.

ELECTRICAL SYSTEM: provided with visible cables trough the inside walls.

01 round LED light 10W

01 socket

01 switch

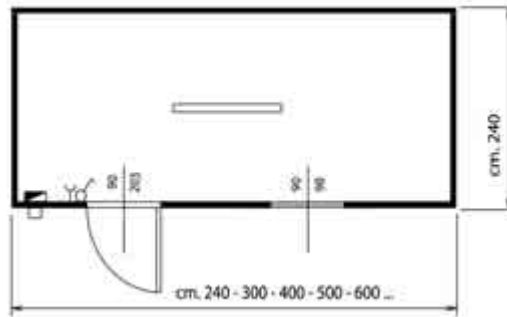

01 ground wire switch, outside watertight box for the connection device, switch board equipped with magneto thermal device.

CODE	DIMENSIONS IN CM	PRICE
MOZIBA20A	205X205X221 H INT (239 EST)	€ 2.835,00
MOZIBA30A	300X205X221 H INT (239 EST)	€ 2.880,00
MOZIBA40A	400X205X221 H INT (239 EST)	€ 3.285,00

ON THE 3 MT MODEL THE WINDOW IS PLACED ON THE SHORT SIGHT.
TO SWITCH IT ON THE LONG SIGHT + € 215,00

INSULATED STANDARD MONOBLOC SERIE 40

REV.1 DEL 15/05/2023

STANDARD INNER HEIGHT 221 CM – EXTERNAL 245 CM

TECHNICAL DETAILS

STRUCTURE: it is made up by base and roofing section bars which are connected through angular uprights. It is an all steel with **15/10 thickness**, zinc-plated sheets, electro welding, protected coated cycle on sight parts, **blue colour RAL 5017**. The complete floor is properly lifted from the ground from **two sleepers**.

WALLS: Sandwich modular panels, self-carrying walls, having pre-varnished white-grey and fret-plated sheets on both sides, insulated inside with self-extinguish expanded foam polyurethane. The whole thickness is **40 mm**.

ROOF: horizontal, made from corrugated sandwich panels with expanded **polyurethane** foam insulation, thickness **30/70 mm**.

FLOOR: walking area made with **PVC** sheets fixed to chipboard panel **thickness mm 18**, upper to the basic frame. The frame is made up of a zinc-plated tubular, electro-welded.

WINDOWS AND DOORS: aluminium/PVC, white RAL 9010, 4 mm glass, safety bars.

01 external door cm 90x200H upper part 4 mm glass + safety bars, blind lower part.

01 sliding opening window cm 90x98H

ELETTRICAL SYSTEM: provided with visible cables trough the inside walls.

01 LED lighting 40W

01 socket

01 switch

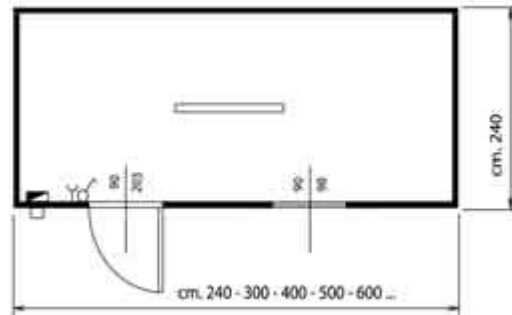

01 ground wire switch - outside watertight box, suitable for the web connection device - switch-board equipped with magneto thermal safety device.

INSULATED STANDARD MONOBLOC SERIE 40 REINFORCED AND SUPERIMPOSABLE

**STANDARD INNER HEIGHT 240 CM – EXTERNAL 269 CM
SUPERIMPOSABLE GROUND FLOOR + FIRST FLOOR**

TECHNICAL DETAILS

STRUCTURE: it is made up by base and roofing section bars which are connected through angular uprights. It is an all steel with **20/10 thickness**, zinc-plated sheets, electro welding, protected coated cycle on sight parts, **blue colour RAL 5017**. The complete floor is properly lifted from the ground from **two sleepers**.

WALLS: Sandwich modular panels, self-carrying walls, having pre-varnished white-grey and fret-plated sheets on both sides, insulated inside with self-extinguish expanded foam polyurethane. The whole thickness is **40 mm**.

ROOF: horizontal, made from corrugated sandwich panels with expanded **polyurethane** foam insulation, thickness **40/80 mm**.

FLOOR: walking area made with **PVC** sheets fixed to chipboard panel **thickness mm 18**, upper to the basic frame. The frame is made up of a zinc-plated tubular, electro-welded.

WINDOWS AND DOORS: aluminium/PVC, white RAL 9010, 4 mm glass, safety bars.
01 external door cm 90x200H upper part 4 mm glass + safety bars, blind lower part.
01 sliding opening window cm 90x98H

ELETTICAL SYSTEM: provided with visible cables trough the inside walls.

01 LED lighting 40W

01 socket

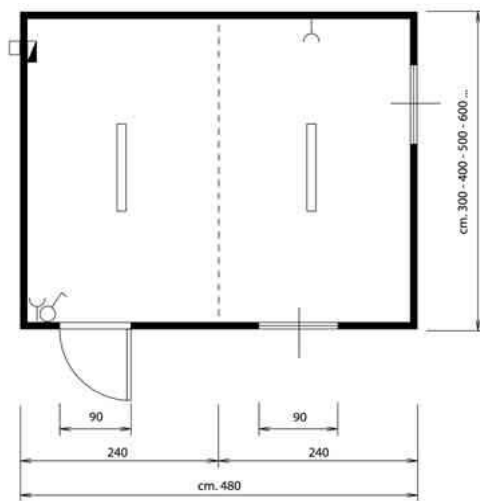

01 switch

01 ground wire switch - outside watertight box, suitable for the web connection device - switch-board equipped with magneto thermal safety device.

STANDARD INNER HEIGHT 223 CM - EXTERNAL 245 CM (A)
 STANDARD INNER HEIGHT 240 CM – EXTERNAL 270 CM (B)
 STANDARD INNER HEIGHT 270 CM – EXTERNAL 298 CM (C)

TECHNICAL DETAILS:

STRUCTURE: it is made up by base and roofing section bars which are connected through angular uprights. It is an all steel with **25/10 thickness**, zinc-plated sheets, electro welding, protected coated cycle on sight parts, **blue colour RAL 5017**.

WALLS: Sandwich modular panels, self-carrying walls, having pre-varnished white-grey and fret-plated sheets on both sides, insulated inside with self-extinguish expanded foam polyurethane. The whole thickness is **50 mm**.

ROOF: horizontal ceiling, whose panels have got the same features of those used for the walls. Fret sheet upper wall: flat thickness **50 mm**, fret thickness **90 mm**.

FLOOR: PVC floor fixed with a special glue to a **waterproof chipboard panel** thickness **18 mm**.

ISOLATION with sandwich panels **mm 30**, which is then fixed to a frame.

WINDOWS AND DOORS: aluminium/PVC white **RAL 9010** colour, **4/9/4 glasses**, PVC roll-up shutter.

01 blind door cm 90x200H

01 tilt and turn opening window cm 90x98H with PVC rolling shutter

ELECTRICAL SYSTEM: provided with visible cables trough the inside walls.

01 LED lighting 40W

01 switch

01 socket

01 ground wire switches - outside watertight box, suitable for the web connection device - switch-board equipped with magneto thermal safety device.

Model **8 / 9 mt** are provided with two LED lightings.

FACILE

STRUCTURE: it is made by floor and roof steel galvanized profiles type S355 with **3 mm thickness**; the columns are 4 mm thickness; RAL 9002 colour.

FLOOR: walking area is made by **anti-slip PVC** which is fixed to a plan formed by **waterproofing panels** thickness **22 mm**.

Insulation is provided by **polystyrene** sheets having a total thickness of **60 mm**.

The **floor chassis** is closed below by the fitting of a **galvanized sheet** thickness **1 mm**.

Predisposition kit fitted into the floor chassis to be able to lift the module by **forks elevator**.

ROOF: horizontal, it is realized by sandwich panels insulated by polyurethane foams. Flat thickness of the panel is **30 mm** while the fret thickness is **70 mm**.

Under the roof, **insulation** is provided by the insertion of one **mineral fibreglass layer**, having a total thickness of **50 mm**. A "C21" pre-painted sheet having staved finishings makes the ceiling.

WALLS: realized by sandwich panels, total thickness **40 mm**; insulation inside is ensured by **polyurethane** foams; the external side of the panel is made by «C21(white-grey) embossed sheet finishing» while the internal side is made by «C21(white-grey) straight sheet finishing».

Panels width: 980 mm/1200mm

DOORS & WINDOWS: aluminium/PVC, pre-painted white RAL 9010 colour.

01 blind door mm 1000x2205H

01 window sliding opening window mm 1000x1200H equipped with camera glass and PVC rolling shutter

ELECTRICAL INSTALLATION

02 LED lightings 40W

02 sockets

01 socket for A/C unit

01 box for connection of the heater unit

01 VDE socket into ceiling for additional light control

01 electrical panel installed into ceiling

01 external watertight box installed into ceiling

01 ground wiring

01 electrical panel switch for additional light control

01 electrical convector 2000W

Same configuration for **FACILE SERIES 60** with these differences: walls panels thickness mm 60, roof insulation thickness mm 50+50 with mineral fibreglass layers, internal height cm 250.
